## WORK EXPERIENCE

### Undergraduate Teaching Assistant

United International University

Currently Serving as UA, where my role involves the following

Mar 2025 – Present

- Assist the instructor in conducting lab sessions for a smooth learning experience for students.
- Help the students understand the fundamentals of computers, and basic C programming.
- Give counselling hours for the students who need more guidance.

## PROJECTS

- Jump N Run** **Python, Pygame**  
A 2D side-scrolling platformer game where players control a character who must avoid obstacles, jump over gaps, and survive as long as possible to score points.
- Rent N Repeat** **HTML, CSS, PHP, MySQL**  
An ecommerce platform where users can rent clothes to and from each other with ease. This project focuses on creating a seamless experience, enabling users to manage their rentals efficiently while ensuring transparency and quality.
- Rhythmify** **HTML, CSS, JavaScript**  
A Spotify clone that allows users to stream music seamlessly. Rhythmify offers an immersive and dynamic user experience.
- Bankify** **Java, JavaFX, CSS**  
Bankify is a banking application designed to provide client and admin functionalities in a streamlined and user-friendly interface.
- Netflix Clone** **HTML, CSS**  
A static website clone of the Netflix homepage. This project replicates the look and feel of Netflix's homepage.
